### Statewide Discussion:

Fire danger today will generally be confined to areas in southwest Oklahoma. The southern tier of counties west of I-35 will see much less sky cover than the majority of Oklahoma and relative humidity values will fall into the 30-35% range yielding dry fine fuels. Temperatures in this area will be 48°-52° with NNW winds around 10 mph and limited gusts. Moderate rates of fire spread should be expected in this area.

The remainder of the state is expected to experience a fair amount of sky cover and relative humidity values above 40%. Dry fine fuels are in place across much of central Oklahoma; however fuel moisture will be above levels of concern today limiting fire behavior.
